## **Aims and Scope**

An international journal devoted to investigations of daylighting in buildings. Journal of Daylighting is the leading journal that publishes original research on all aspects of daylighting. The aim is to present cutting edge research aimed at reducing the electric lighting energy use in buildings and improving indoor environment. Topics covered include:

- Daylighting systems
- Lighting simulation
- Lighting designs
- Lighting metrology and light quality
- Lighting control
- Building physics - lighting
- Building energy modeling
- Energy efficient buildings
- Zero-energy buildings
- Indoor environment quality
- Sustainable solar energy systems
- Application of solar energy sources in buildings
- Photovoltaics systems
- Building-integrated photovoltaics
- Concentrator technology
- Concentrator photovoltaic
- Solar thermal

## **Publication Information**

Journal of Daylighting (ISSN 2383-8701). For 2020, two issues are scheduled for publication. Further information is available on this journal through Solarlits's website: (<https://solarlits.com/>).
