Aims and Scope

Journal of Daylighting is a peer-reviewed international journal devoted to investigations of daylighting in buildings. It is the leading journal that publishes original research on all aspects of solar energy, buildings, and lighting. Areas of special interest for this journal include, but are not limited to, the following:

- Solar energy
 - Photovoltaic cells and systems
 - Building-integrated photovoltaics
 - Solar thermal
 - Energy systems
 - Energy storage and applications
 - Artificial intelligence in energy systems
- Buildings
 - Architectural/Building engineering
 - Smart buildings
 - Building energy modeling
 - Building physics
 - Building envelopes
 - Indoor environment quality
- Lighting
 - Daylighting
 - Artificial lighting
 - Lighting simulation
 - Lighting designs
 - Luminaires
 - Lighting metrology and light quality
 - Lighting control
 - Optical sensors

Publication Information

Journal of Daylighting (ISSN 2383-8701). For 2023, two issues are scheduled for publication. Further information is available on this journal through Solarlits's website: (<https://solarlits.com/>).
